

Fiber is Greener!

Our climate action plan by 2030:

Our Vision is to **connect people**, free from waste or pollution, enhancing environmental quality and health in our communities.

1 Bring superior fiber-based service to our new and existing customer base

2 Thoughtfully migrate customers from copper to fiber-based service, and shut down elements of the copper network

3 Increase the pace of divestment and efficiency projects in our network, facilities & fleet

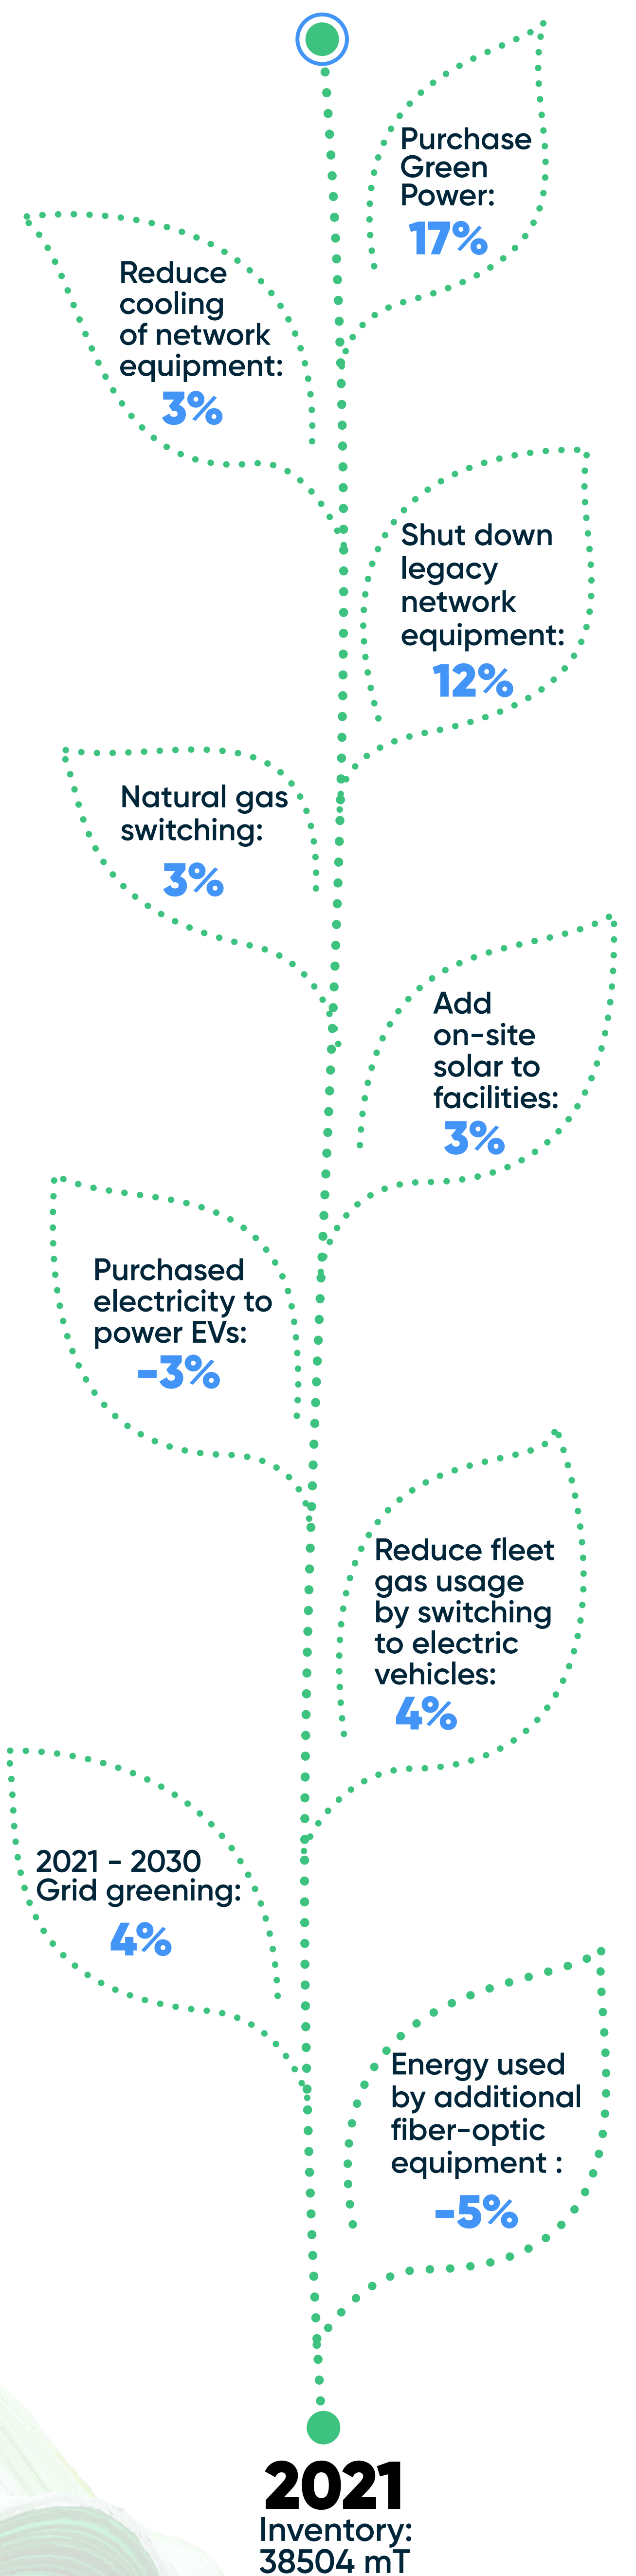

4 Add on-site solar photovoltaic systems where feasible and buy renewable power

5 Integrate available electric vehicle models into our fleet as we replace vehicles at end-of-life

Result:
2030 **40% Reduction**
